

Magnetic Analysis Corporation Launches Magnetic Analysis India Private Limited

Magnetic Analysis Corporation (MAC®), a global leader in nondestructive testing (NDT) for over 95 years, is pleased to announce the launch of its new subsidiary, Magnetic Analysis India Private Limited (MAIPL). This expansion highlights MAC's commitment to supporting India's industrial growth by providing localized, high-quality testing solutions and customer service.

The establishment of MAIPL marks a significant milestone in MAC's mission to collaborate with Indian producers and fabricators of tube, bar, wire and parts serving industries such as Oil Country Tubular Goods (OCTG), aerospace, medical, automotive and infrastructure. MAIPL's seamless support at every step—from consultation to installation ensures these sectors have access to the latest in NDT innovation.

Leading this new venture is Parag Nag, Business Development Leader, with over 30 years of experience in India's NDT industry. "MAIPL will enable the team here to better serve our customers, provide innovative solutions, and contribute to the growth and development of the Indian market," said Parag Nag.

Under his leadership, MAIPL will offer MAC's full portfolio of advanced NDT equipment and custom systems, including solutions in eddy current (ECT), ultrasonic testing (UT), magnetic flux leakage (MFL), and phased array

ultrasonic testing (PAUT). This broad product range ensures that Indian manufacturers can access the most reliable, cutting-edge testing solutions available.

MAC's expansion into India reflects its legacy of innovation, precision, and customer-centric service. The company remains focused on quality, collaboration, and providing tailored solutions to meet the evolving needs of its global customer base.
